NATIONAL POULTRY IMPROVEMENT PLAN

The National Poultry Improvement Plan became operative July 1, 1935, and the National Turkey Improvement Plan was activated on September 25, 1943, with the approval of the Secretary of Agriculture. On December 3, 1971, the two Plans were combined under one title, "The National Poultry Improvement Plan," with separate provisions applicable to the different types of poultry.

The Plan operates through an appropriation made by Congress to the United States Department of Agriculture, to be used in cooperation with the State authorities in the administration of regulations for the improvement of poultry, poultry products, and hatcheries. Authority for the administration of the Plan is now contained in the Department of Agriculture Organic Act of 1944, as amended (7 U.S.C. 429).

Provisions of the Plan are changed from time to time to conform with the development of the industry and with new information as it becomes available. These changes are based on recommendations made at the Biennial National Plan Conferences by official delegates representing participating breeders, hatcheries, and flockowners from all cooperating States. Current provisions of the Plan are contained in a publication entitled "The National Poultry Improvement Plan and Auxiliary Provisions." The publication is available from Official State Agencies or on request to the National Poultry Improvement Plan, APHIS-VS, Room 828, FCB #1, Hyattsville, Maryland 20782.

Strain or trade names are mentioned in this publication solely to provide specific information. The mention of such names does not constitute a guarantee or warranty of the product.

NATIONAL POULTRY IMPROVEMENT PLAN
1985 DIRECTORY OF PARTICIPANTS HANDLING EGG-TYPE AND
MEAT-TYPE CHICKENS AND TURKEYS

Introduction

The hatcheries, dealers, and independent flocks listed in this publication are participating in the National Poultry Improvement Plan, according to reports submitted by the Official State Agencies. This list of participants is published for the purpose of developing greater efficiency in the operation of the Plan. Additional information regarding participants may be obtained by communicating with the Contact Representative of the Official State Agency of the respective State. The Contact Representative's name, address, and telephone number are given at the beginning of each State's listings in table 1.

This publication is revised each year because of frequent changes in participation and the need for inspectors, hatcherymen, dealers, and others to have up-to-date information. In addition to this listing, all Official State Agencies are notified of changes in participation which take place during the year.

The National Poultry Improvement Plan provisions, as contained in Title 9, Chapter I, Parts 145 and 147 of the Code of Federal Regulations, provide for recognition of different classes or types of fowl as follows: Subpart B--Egg-Type Chickens; Subpart C--Meat-Type Chickens; Subpart D--Turkeys; and Subpart E--Waterfowl, Exhibition Poultry, and Game Birds. Participants handling egg- and meat-type chickens are listed together in table 1 and those handling turkeys are listed in table 2. Participants dealing in waterfowl, exhibition poultry, and game birds are listed in a separate publication in this series.

Approval Numbers

In each of the above tables, the numerals preceding the name of the State, together with those preceding the name of each participant, constitute the participant's approval number. For example, the approval number for the first hatchery listed under Alabama is 64-33. The No. 64 represents the State of Alabama; No. 33, represents Arbor Acres Hatchery, RR 5, Albertville 35950. These assigned numbers may be used by participants on shipping labels, certificates, invoices, and other documents for identification. They may also be used as reference numbers for shipments to member States of the European Economic Community.

Participant's Name and Address

Three types of participants are listed in this publication, namely those participating as a hatchery, as a dealer, or as an independent flock. For each State, the type of participant is given immediately above the first name in that category.

Hatching-Egg Capacity

Figures in this column refer to the hatching-egg capacity of hatcheries, according to manufacturer's rating, including setting and hatching trays. Letter symbols in this column refer to products that dealers handle, as follows: E, hatching eggs; C, chicks; P, poults; and SP, started pullets. When an independent flock is listed, this column is left blank.

Products and Classifications

All products handled by participants listed in this publication meet the specific requirements for a "U.S. Pullorum-Typhoid Clean" classification. The combined letter and numeral symbols shown in the fourth column identify the particular strain or trade name of the participant's products (see tables 3 and 4 in the appendix). Crosses are designated by combining the letter symbols and code numbers of both parent stocks, listing the male first. Thus a t9t18 code would indicate that the participant was handling a cross consisting of a Hubbard male mated to a Pilch female. Additional classifications for which these products qualify are identified in column five by MG, "U.S. M. Gallisepticum Clean"; MS, "U.S. M. Synoviae Clean"; MM, "U.S. M. Meleagridis Clean"; and SAN MONITOR, Sanitation Monitored.

EGG- AND MEAT-TYPE CHICKENS

Explanation for Table 1

Participants listed in table 1 represent hatcheries, dealers, or independent flocks handling egg- or meat-type chickens. The major products they handle have a letter symbol as follows:

a--White Leghorn	h--Cornish	t--Meat production stocks
b--Rhode Island Red	n--Game chickens	w--Bantams
c--Barred Rock	r--Other large breeds and varieties	x--Ducks
d--White Rock	s--Egg production stocks	y--Geese
e--New Hampshire		z--Other birds

These letter symbols, together with accompanying numerals representing specific breed, strain, or trade names, are fully explained in table 3.

TURKEYS

Explanation for Table 2

Participants listed in table 2 represent hatcheries, dealers, or independent flocks handling turkeys. The products they handle have a letter symbol as follows:

A--Broad Breasted Bronze
C--Large and Medium White
D--Small White
E--Other Varieties

These letter symbols, together with accompanying numerals representing specific strain or trade names, are fully explained in table 4.

If the participants listed in this table handle other classes of poultry, they would also be listed in table 1 of this publication or in table 1 of APHIS 91-42.
